

## Digital World NATIVE Coin Allocation

Jurisdiction: The Digital World ([www.digitalworld.earth](http://www.digitalworld.earth))

Effective Date: [Insert Date]

---

# Preamble

As the Digital World and its NATIVE Coin are adopted and integrated into the global economy, this document establishes the foundational responsibilities of the Digital World ecosystem. These principles aim to ensure a stable and thriving digital future while fostering global sustainability, equity, and environmental stewardship.

The wealth and value generated through the adoption of the Digital World and its NATIVE Coin will be channeled into creating a sustainable and equitable future for all. Investments will focus on ambient energy, hydrogen fuels, data storage innovations, communications systems, and digital exchanges for humanity.

---

## Section 1: Commitment to Stability and Longevity

### 1.1 Economic Stability

- The Digital World commits to creating an indefinitely stable economic ecosystem, where the value of the NATIVE Coin is backed by tangible and transparent mechanisms, including:
  - Precious metals.
  - Renewable energy investments.
  - Natural resources.
- Stability mechanisms will ensure resilience against inflation, speculation, and market volatility.

### 1.2 Generational Responsibility

- A portion of all NATIVE Coin transactions will be allocated to long-term reserves, ensuring economic security for future generations.
- 

## Section 2: Listing and Exchange of NATIVE Coin

### 2.1 Exchange Integration

NATIVE Coin will be listed on:

- Private Exchanges: For exclusive access by accredited investors and private entities.
- Public Exchanges: To enable widespread accessibility for individuals and businesses.
- Centralized Exchanges: To leverage established platforms with high liquidity and global reach.

- Decentralized Exchanges (DEXs): To uphold decentralization, security, and peer-to-peer transactions.

## **2.2 Global Availability**

- NATIVE Coin will be accessible in all regions where compliance with local laws and regulations is maintained.
- Multilingual and multi-currency support will be implemented to ensure inclusivity.

## **2.3 Adoption Strategy**

- Collaborate with existing exchanges to promote the adoption of NATIVE Coin.
- Provide educational resources to help users understand the utility and benefits of NATIVE Coin in fostering sustainability and equity.

## **2.4 Utility as a Digital Exchange Enabler**

- The Digital World will develop its own utility-grade digital exchange platform, offering a decentralized, scalable, and user-friendly infrastructure that serves humanity indefinitely.
- 

# **Section 3: Digital Exchanges as a Utility for Humanity**

## **3.1 Vision for Digital Exchanges**

- Establish digital exchanges as a universal utility, enabling individuals, businesses, and communities to participate in a fair and inclusive global economy.
- Prioritize accessibility, security, and transparency for all users.

## **3.2 Features of Digital World Exchanges**

- Seamless Transactions: Facilitate transactions for NATIVE Coin and other digital assets with low fees and real-time settlement.
- Interoperability: Support cross-chain transactions to integrate with multiple blockchain ecosystems.
- Asset Diversity: Allow trading of cryptocurrencies, tokenized commodities (e.g., gold, silver), and digital assets backed by real-world value.

## **3.3 Decentralized Infrastructure**

- Leverage blockchain technology to ensure exchanges are resilient, transparent, and collectively governed by participants.

- Use smart contracts to automate and secure trading, settlement, and dispute resolution.

### **3.4 Indefinite Utility for Humanity**

Ensure the exchange infrastructure is:

- Sustainable: Powered by renewable energy and optimized for minimal resource consumption.
- Non-Profit Utility: Operated to serve humanity, with revenues reinvested into infrastructure and community development.
- Perpetual Access: Maintain the platform indefinitely for future generations, with self-sustaining governance models.

### **3.5 Educational and Economic Empowerment**

- Provide resources to educate users on digital finance, blockchain, and decentralized technologies.
- Support underserved communities by enabling access to global financial systems through the digital exchange.

### **3.6 Collaboration and Innovation**

- Partner with governments, organizations, and private sectors to expand the utility of digital exchanges.
- Promote innovation by integrating ambient energy and hydrogen-powered technologies into exchange operations.

---

## **Section 4: Environmental and Cultural Preservation**

### **4.1 Natural Resource Stewardship**

- All Digital World operations will adhere to the principle that natural resources are to be cared for, not controlled.
- Actively fund projects aimed at restoring ecosystems, protecting biodiversity, and preserving natural habitats.

### **4.2 Integration of Exchanges in Sustainability Efforts**

Revenues from digital exchanges will fund sustainability initiatives, including:

- Renewable energy projects.
- Hydrogen fuel advancements.
- Clean water access.

Exchange operations will align with broader goals of ecological preservation and cultural respect.

---

## **Section 5: Governance and Transparency**

### **5.1 Decentralized Oversight**

- Governance of the Digital World, NATIVE Coin, and its digital exchanges will be conducted transparently through a decentralized system where all stakeholders can participate.
- Key decisions regarding exchange development and operations will be made collectively.

### **5.2 Audit and Reporting**

- Annual reports on exchange operations, sustainability progress, and community impacts will be made publicly accessible.
  - Blockchain-based tracking will ensure that all investments and allocations are transparent and accountable.
- 

## **Section 6: Allocation of Resources**

### **6.1 NATIVE Coin Revenue Distribution**

Revenues generated from NATIVE Coin transactions will be allocated as follows:

- 20%: Investments in renewable energy projects, including ambient energy and hydrogen technologies.
  - 20%: Development of sustainable Earth-based and space-based data storage and communication systems.
  - 20%: Support for digital exchange infrastructure as a utility for humanity.
  - 15%: Clean water and sustainable agriculture initiatives.
  - 15%: Education, research, and advocacy.
  - 10%: Administrative and operational sustainability. (This 10% will be the priority before the remaining 90% can be allocated after 10 years of systems have been prepaid with key direct and indirect hosting and storage vendors.)
-

## **Conclusion**

The Digital World and its NATIVE Coin are more than a financial system—they represent a global responsibility platform. By listing NATIVE Coin on private, public, centralized, and decentralized exchanges, and establishing digital exchanges as an indefinite utility for humanity, the Digital World will ensure equitable access to global financial systems while fostering sustainability, resilience, and innovation for generations to come.
